

BHAVYAA BANSAL

AI & ML Engineering Student | Aspiring Data Analyst

Delhi, India | bhavyaabansal22@gmail.com | [LinkedIn](#) | [GitHub](#)

OBJECTIVE

B.Tech (AI & ML) student with hands-on project experience in Python, SQL, and Excel across data cleaning, exploratory data analysis, dashboard development, and machine learning. Skilled at turning raw datasets into clear, decision-ready insights using Pandas, MySQL, and interactive dashboards. Seeking a Data Analyst Internship to apply strong analytical and problem-solving skills to real business data.

SKILLS

Programming Languages: Python, SQL, C++ (Basic), C (Basic)

Tools: Python, SQL, Excel, MySQL Workbench, Jupyter Notebook, Git, GitHub, Streamlit, VS Code

Libraries: Pandas, NumPy, Matplotlib, Scikit-learn, Seaborn

Data Analytics: Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Dashboard Development, Machine Learning Fundamentals

Soft Skills: Analytical Thinking, Problem Solving, Communication, Team Collaboration

Languages Spoken: Hindi (fluent), English

PROJECTS

Diwali Sales Analysis

Python, Pandas, NumPy, Matplotlib

- Cleaned and pre-processed a multi-category retail sales dataset in Python and Pandas, resolving missing values and inconsistent formatting to prepare it for analysis.
- Performed exploratory data analysis (EDA) to uncover customer purchasing patterns across demographics, product categories, and regions.
- Built Matplotlib visualizations translating raw sales data into clear, business-ready insights for data-driven decision-making.

Online Bookstore Sales Analysis

MySQL

- Wrote SQL queries using joins, aggregate functions, grouping, filtering, and sorting to analyze customer, order, and inventory data across relational tables.
- Extracted insights on customer behavior, sales performance, and revenue trends to answer specific business questions from the dataset.

Vrinda Store Sales Analysis Dashboard

Microsoft Excel

- Cleaned and transformed raw sales data to improve reporting accuracy ahead of dashboard build-out.
- Built an interactive Excel dashboard using Pivot Tables, Pivot Charts, and Slicers for dynamic, self-serve reporting.
- Surfaced key business insights, including top-performing states, sales channels, customer demographics, and product categories.

Insurance Premium Prediction

Python, Pandas, NumPy, Scikit-learn, Streamlit

- Built an end-to-end machine learning pipeline to predict insurance premiums from customer attributes, covering preprocessing, feature engineering, model training, and evaluation.
- Evaluated model performance using standard regression metrics (e.g., R^2 and RMSE) to validate prediction quality before deployment.
- Developed an interactive Streamlit application allowing users to input customer attributes and receive real-time premium predictions.

EDUCATION

B.Tech in Computer Science, specialization in AI & ML — University School of Automation & Robotics, GGSIPU, East Delhi
2024 – Present

- CGPA: 9.12

CBSE Class XII (PCM + Painting) — Khaitan Public School, Sahibabad, U.P. 2022 – 2024

- Scored 97.2%; JEE Mains 2024-25: 95.8 percentile, All India Rank 64,462.

CBSE Class X — Vidya Bharati School, Ghaziabad, U.P. 2018 – 2021

- Scored 96.8%; school-level Silver Medallist (National Science Olympiad) and Gold Medallist (International Maths Olympiad).

CERTIFICATIONS

- IBM — Ethical Considerations for Generative AI
- Google Cloud Study Jams 2025 — Multiple Skill Badges
- Cisco Networking Academy & NASSCOM — Introduction to IoT and Digital Transformation
- HelloPM — AI Sprint Bootcamp

ACHIEVEMENTS & ACTIVITIES

- Advanced to the District Level, Delhi AI Grind Hackathon.
- Selected among the Top 200 Teams, ParanoX 2.0 Hackathon (TechXNinjas).
- Active hackathon participant, with 10+ hackathons entered to date.
